The screenshot shows a web browser window with two tabs: 'Remix - Ethereum IDE' and 'React App'. The address bar shows 'localhost:3000'. The browser window displays a React application with a dark background. The application has two forms side-by-side. The left form is for adding a product, with inputs for 'Rice', 'rice, (Oryza sativa), edible', and '100', and a blue 'Add Product' button. The right form is for updating a product, with inputs for 'Rice', 'rice, (Oryza sativa), edible', and '100', and a blue 'Update Product' button. Below these forms is a blue 'Get Product Details' button. Below this button, the text 'Rice' is displayed, followed by a paragraph: 'rice, (Oryza sativa), edible starchy cereal grain and the grass plant (family Poaceae) by which it is produced.' Below the paragraph is the number '100', and at the bottom is a long hexadecimal string: '0x363bF569732E0e3E91011DCf449aD5C7D5611Ef7'.
